Precautions for use

- 1. To protect the LED light strip, do not hit the light-emitting area with hard things.
- 2. After unpacking, please use in 24H to avoid the oxidation effect of solder joints.
- 3. Avoid direct contact with high temperature objects in the light-emitting area of the lamp, and the instantaneous contact temperature of the surface of the light-emitting area should be less than 210 °C.
- 4. The soldering iron temperature should be less than 300° during soldering, and the soldering time of single solder should be controlled within 3s.
- 5. It is strictly forbidden to twist the lamp with short distance. The single lamp strip (0.5 m) has a maximum twist angle of 720°.

- 6. The bend diameter at any position needs to be greater than 1cm.
